

# ArchiMate Case study

Driving licence

Changes in my organisation

# Approach

## 1. Get a broad understanding of the complete system

1. Who are the actors
2. What are my responsibilities

## 2. Understand my organisation

1. How do I meet my responsibilities
2. How am I organised business and IT wise

## 3. Identify the driver for change and its impact

1. Why do we need the change, what is actually targetted
2. What do we need to change to the (eco)system

The ecosystem

The organisation's  
system

The changes to  
the system

The driver  
of change

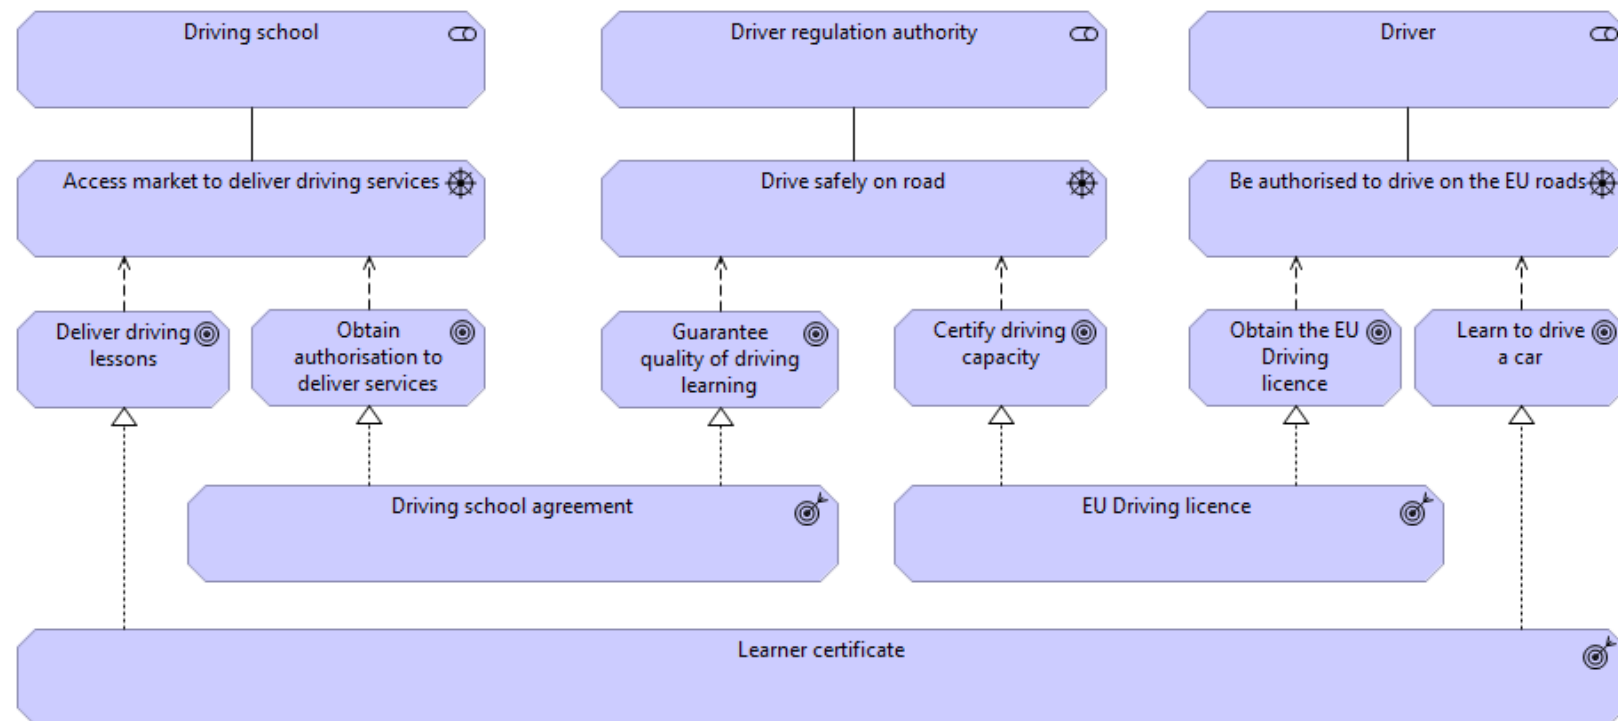

Current strategy

Strategic Capabilities

# ... and operations

Strategic Capabilities

Drivers for change

# New challenge for my organisation

- Paperless administration
  - Remove the paper in the management of the driving schools
  - Avoid duplicating information on driving schools across the actors
- Dematerialisation of the driving licence
  - Digital driving licence is an EU initiative
  - Get ready by piloting the eWallet technology

# New challenge for my organisation

- Paperless administration
  - Remove the paper in the management of the driving schools
  - Avoid duplicating information on driving schools across the actors
- Dematerialisation of the driving licence
  - Digital driving licence is an EU initiative
  - Get ready by piloting the eWallet technology

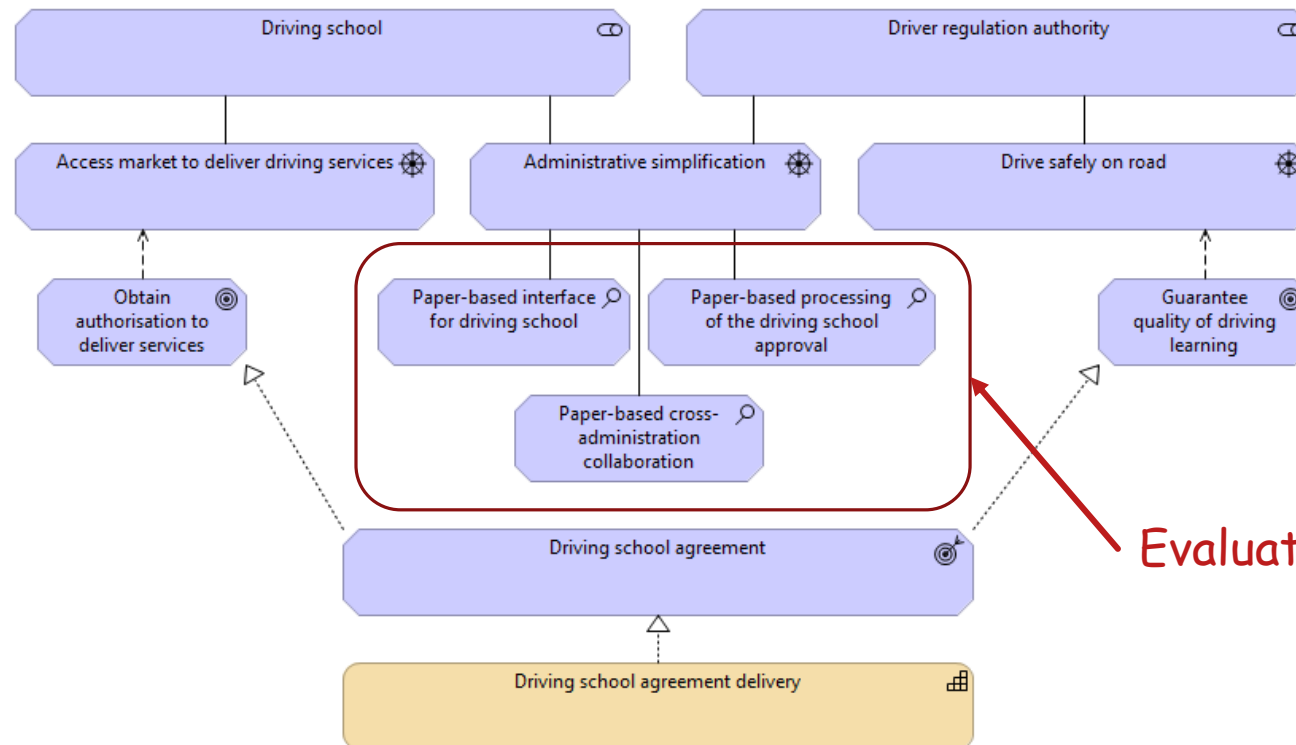

Administrative  
simplification

Technological  
Innovation  
(technology push)

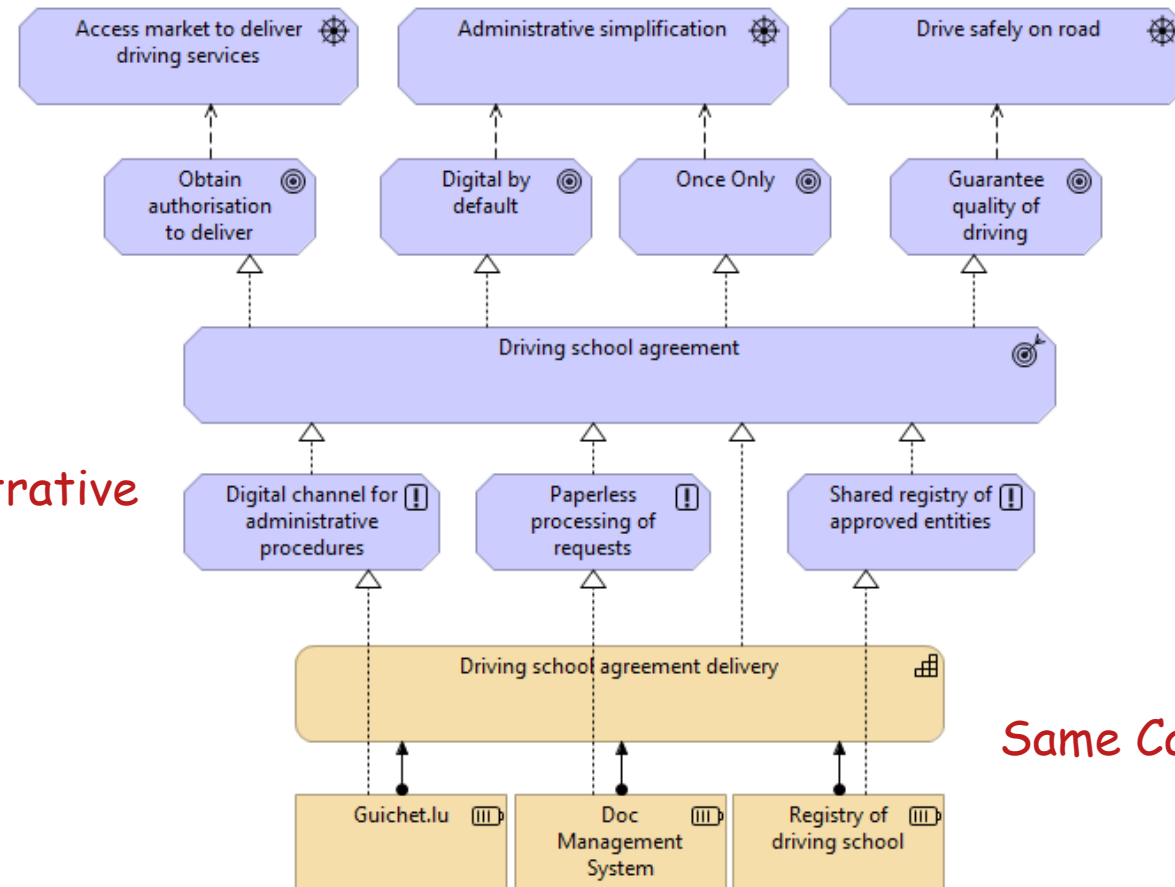

Paperless operations

# Administrative simplification concern

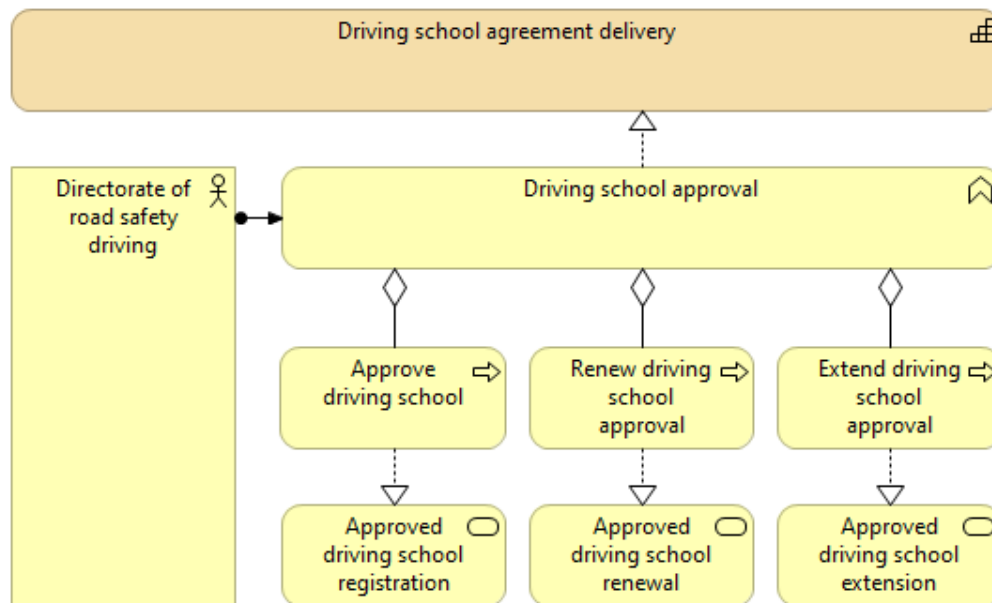

# Adopting principles

Principles of Administrative Simplification

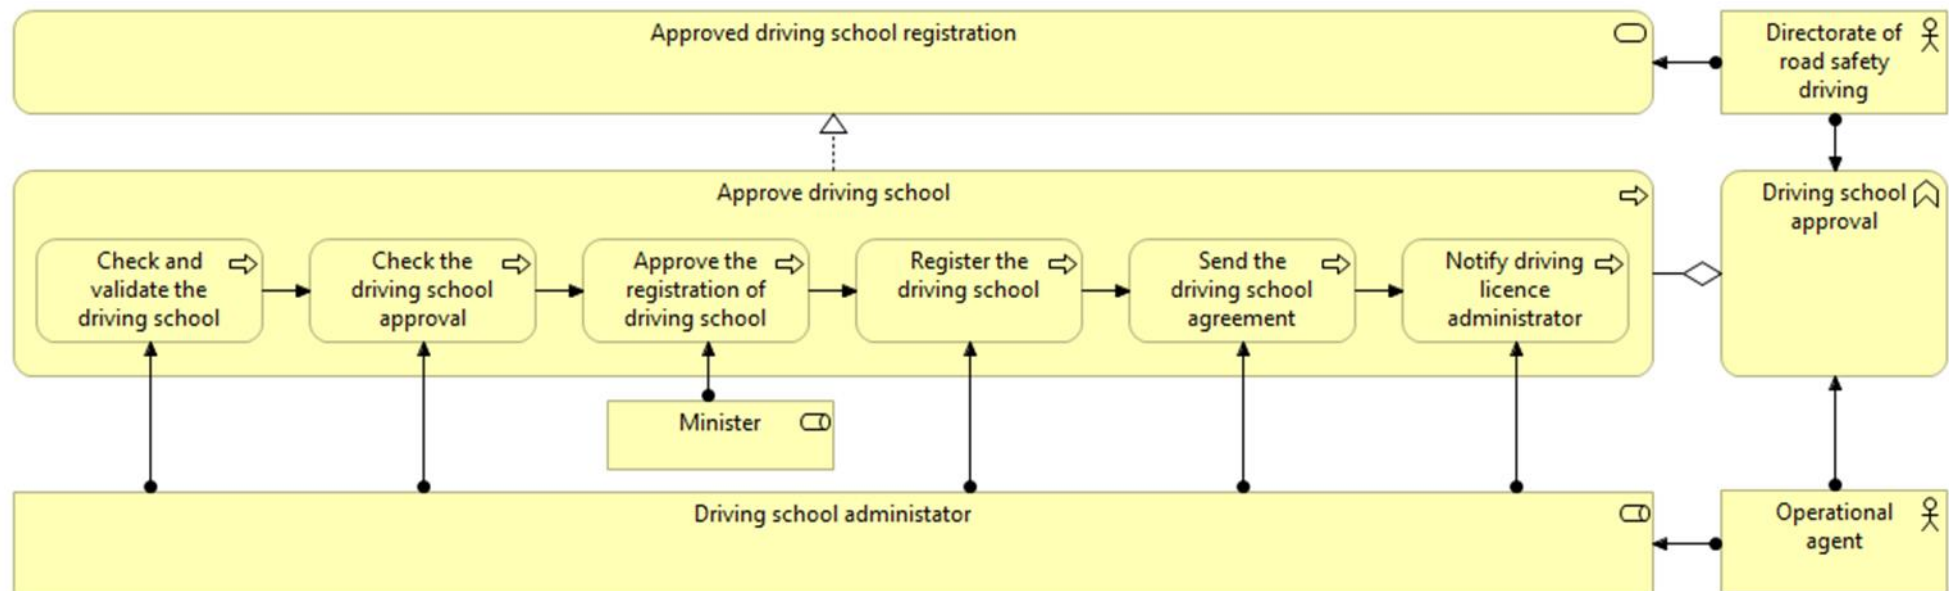

Same Capability using new resources

# Architecture zone impacted

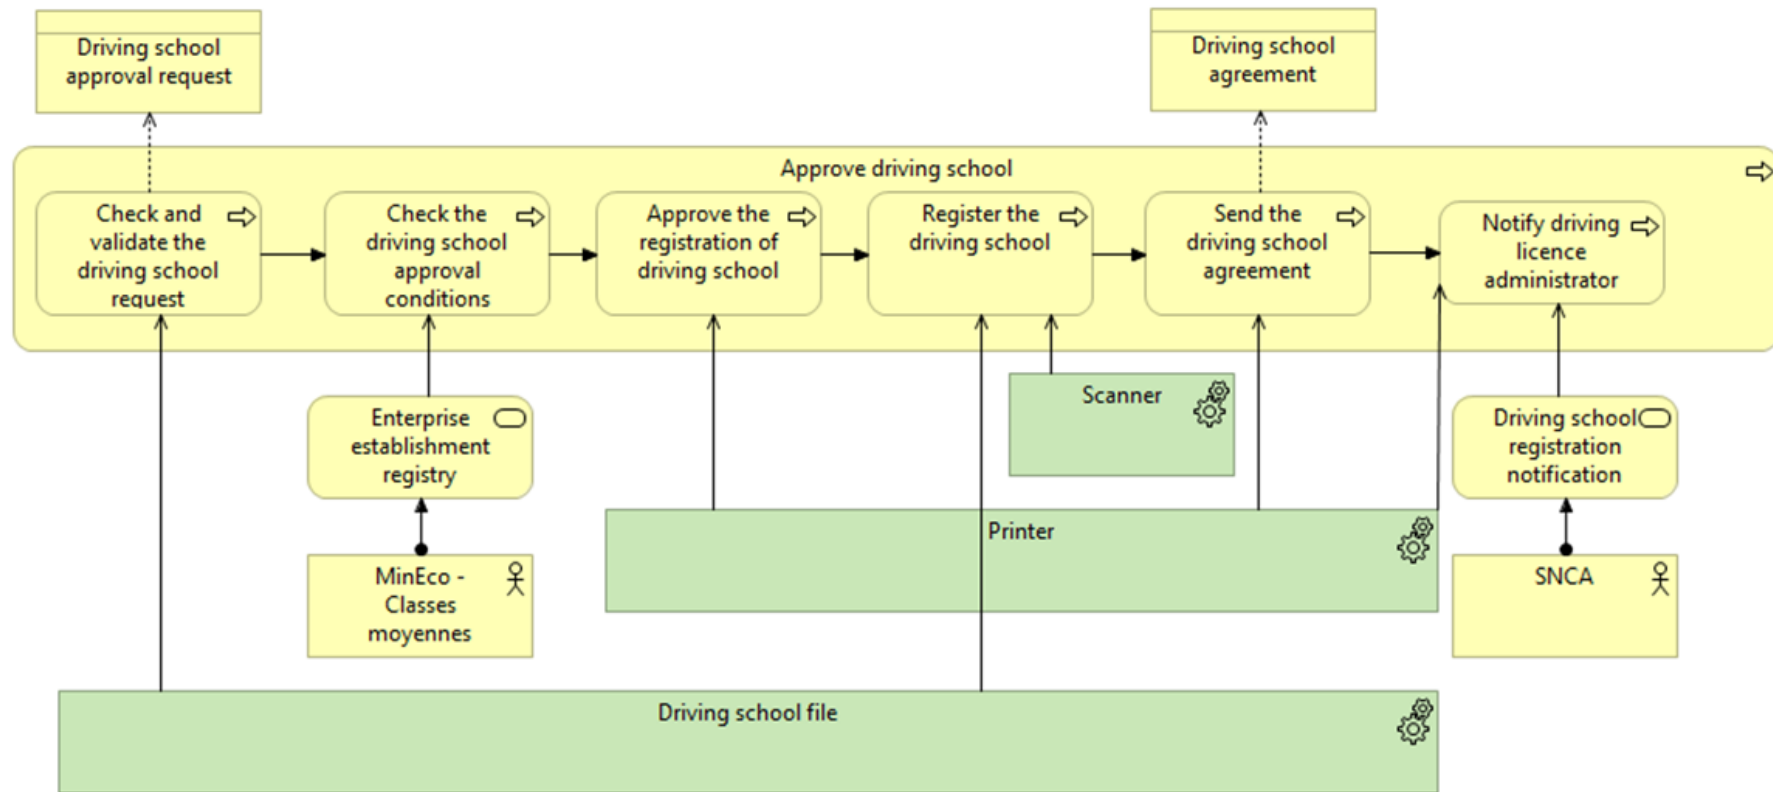

- The Capability is realized by the business function
- The business function has the responsibility of the business processes delivering the services

# Architecture impacts - BP

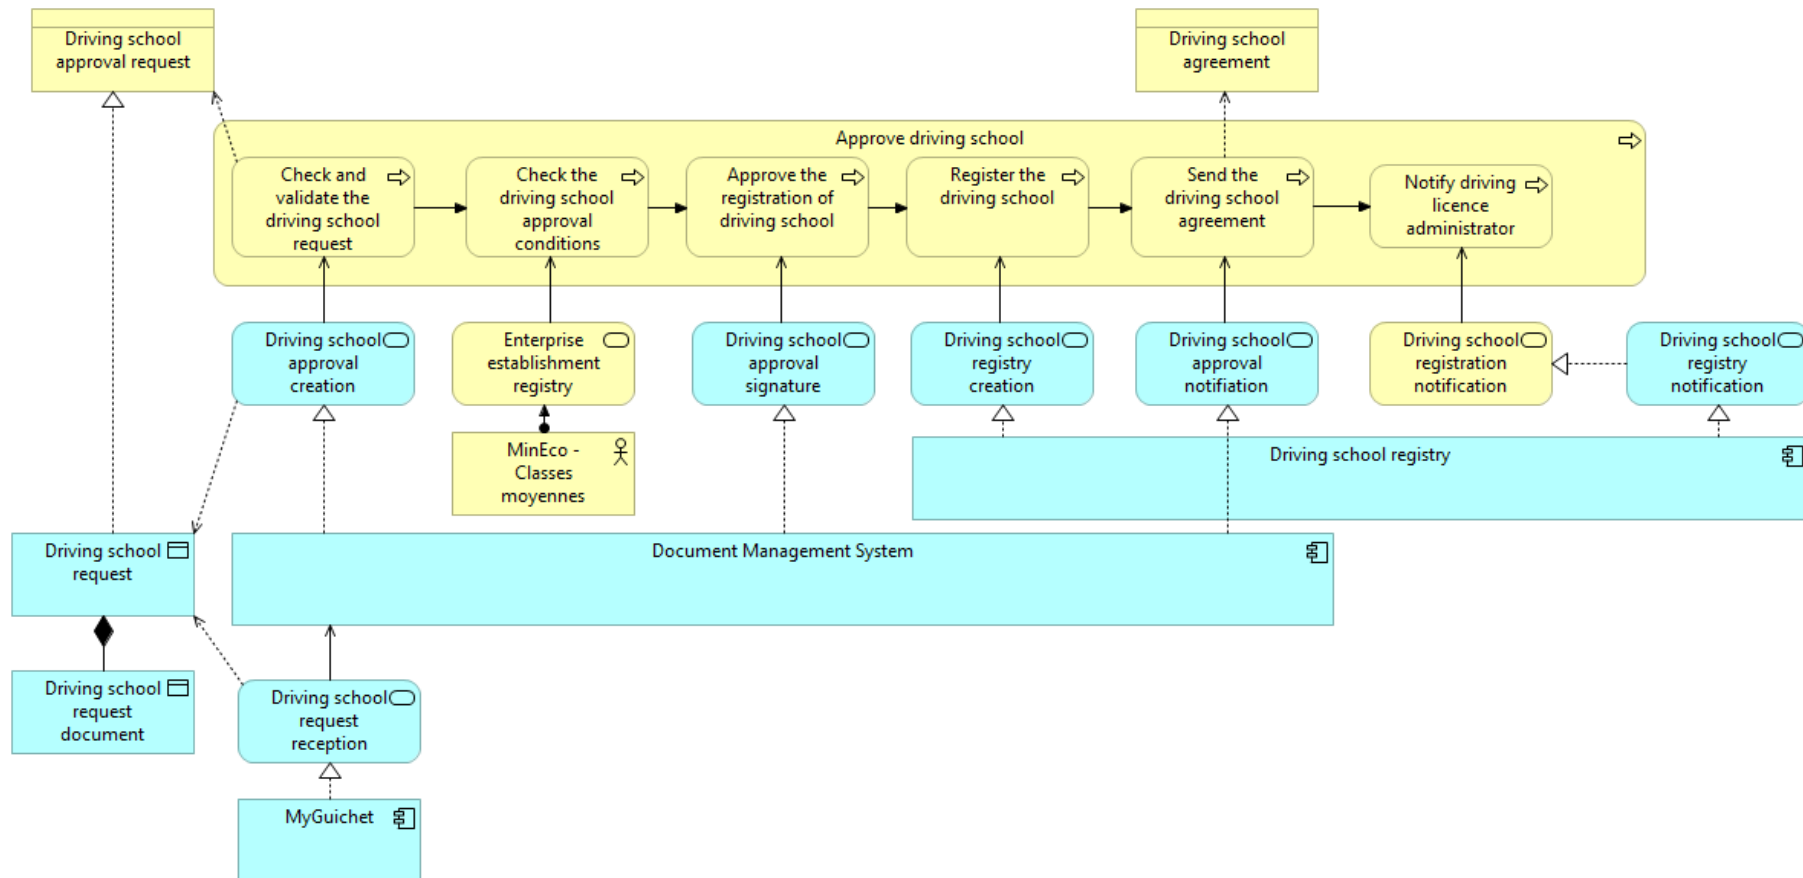

# Baseline architecture

# Target architecture

Digital driving licence

# Technology push

- eWallet is a technology being developed by Ministry for Digitalisation
- Driving licence is a business case

New strategic capabilities and resources
